

2026 Flourishing Community Fall Convening: Flourishing in the Age of AI: A One-Day Deep Dive

AI is moving faster than your organization's ability to adapt. Spend one day with the people building the frameworks to close that gap — before it closes on you.

Hosted and organized by:

Eleanor Allen

Flourishing Work Alliance - CEO

Rob Nail
Futurist

Tamar Lechner
AI Expert

Bonnie Davis
Author

Gigi Karmous
Technologist

In continuing to build an intentional professional community grounded in flourishing principles, we're offering a fall convening (both in person and virtual). It's a chance to (re)connect, and to keep building your personal flourishing roadmap and your organization's flourishing blueprint. We'll also do a deep dive into a topic relevant to all of us: AI.

Organized by

Event Details

November 12, 2026

In person and virtual

9:00 AM - 5:00 PM

*followed by a Happy Hour from
5:00 - 7:00 PM*

**Upper Larimer Events Center
3034 Larimer St., Denver, CO**

Learning Objectives

- Move personal flourishing roadmaps forward
- Enable our organizational flourishing blueprints
- Reimagine the future where human-centered skills develop at a pace to accompany AI
- Tackle this sociotechnical grand challenge with skill and optimism
- Build community

Because Flourishing People Build Flourishing Organizations

AI is not a distant force reshaping work and life — it is already here, moving faster than most organizations can absorb. This one-day summit brings together a small, curated group of leaders to answer the question that matters most right now: what does it take for people and organizations to flourish inside that shift, rather than be flattened by it?

The morning is a guided check-in on personal flourishing and organizational flourishing blueprints — a working session, not a lecture. The afternoon turns to three practitioners who have spent their careers at the intersection of exponential technology, human flourishing science, and organizational culture, for a deep dive into what AI means for how people work, lead, and thrive.

Rob Nail
Futurist

Rob Nail — Former CEO of Singularity University; now Head of AI and Innovation at HU-X and Venture Partner on AI Safety at Lionheart Ventures. Built and sold Velocity11 to Agilent, and served as a public board director through Harman's ~\$8B acquisition by Samsung.

Tamar Lechner
AI Expert

Tamara Lechner — Chairs the AI for Human Flourishing think tank within Harvard's Human Flourishing Program and co-chairs the IEEE Global AIS Flourishing Collaborative. Co-founder of First Phone License, the world's first progressive-unlocking smartphone education system.

Bonnie Davis
Author

Bonnie Davis — Author, Keynote speaker, Certified Executive Coach, and Founding Partner at HuWork. Twenty-five years helping organizations strengthen leadership, culture, and collaboration; co-author of *Still Human: Building Organizations Where Leaders & Teams Thrive with AI*.

Gigi Karmous
Technologist

Gigi Karmous-Edwards — CEO and President of Karmous Edwards Consulting. Three decades translating emerging technology, including IoT, cloud, data analytics, and machine learning, into digital transformation strategy for global water utilities, with 23+ peer-reviewed publications; now applies that same lens to AI in everyday habits.
